

Financial Consideration:

The Billing Staff of Nephrology Consultants are highly trained in ICD 10-CM, CPT coding and Insurance Verification.

We file all insurances and bill our patients for Deductible and co-pays and non-covered items after the insurance processes.

We are happy to work with patients with financial hardships. We know a major hospital bill along with multiple Physician bills can be overwhelming.

You may call our office at 256-533-4626 to discuss your bill with our staff. We work with all patients to try to make your account management for you.

For consideration of a balance write off you must show your yearly income and monthly bills. This information is kept strictly confidential.

This information is reviewed by the Practice Administrator for write off consideration
